What is CartFlow?

CartFlow is a mobile-first online store built for sellers who already sell on **WhatsApp, Instagram, and DMs**.

Instead of sending prices, account numbers, and screenshots in chat every time, you get **one professional link** your customers can open, browse, and checkout from.

Example demo store: <https://cartflow-839.vercel.app/glow-beauty>

Customers add to cart, pay to **your bank account**, upload their payment receipt, and you approve the order from your dashboard — on your phone or laptop.

You still get paid directly. CartFlow does not hold your money. It organizes your catalog, orders, stock, and fulfillment in one place.

How does CartFlow help you?

Before CartFlow (chat selling)

- "How much?" "Send account." "I don pay o." — repeated in every chat
- Receipts lost in WhatsApp threads
- Stock mistakes — two people pay for the last item
- No order numbers, no tracking
- You must be online to run everything yourself

With CartFlow

- **One link** — share on WhatsApp status, bio, broadcast lists
- **Proper catalog** — photos, prices, sizes/variants
- **Structured checkout** — customer details, delivery fee, order number
- **Payment proof** — customer uploads receipt at checkout
- **Order dashboard** — approve, decline, or refund; update status
- **Inventory sync** — stock reduces when you approve payment
- **Order tracking** — customers check status with their order number

- **Team & staff** — hire help for dispatch and inventory while **you** control sales and money

Run your business while you're not around

CartFlow is built for owners who want to **grow without being glued to their phone**.

You stay in control of sales

- **Only the owner** can approve or reject payments (staff cannot touch your money decisions)
- **Only the owner** can change bank details, billing, and store settings
- You see **who did what** — every action is logged ("Order marked Shipped by Amaka · staff")

Hire staff for the work you delegate

Add team members from **Dashboard** → **Settings** → **Team** (Pro plan — up to 5 seats).

Role	Best for	What they can do
Fulfillment	Dispatch rider, warehouse helper	View orders, update status (Processing → Shipped → Delivered), add notes
Staff	Shop assistant	Orders, products, catalog, promotions — no payment approval
Catalog	Someone who manages stock/photos	Add and edit products and categories — no orders
Manager	Trusted supervisor	Full day-to-day ops — still no bank access or payment approval
Custom	Your exact setup	Pick permissions one by one

A typical setup

- **You (owner):** Approve payments, check revenue, change prices, manage bank details — even from abroad or after closing hours
- **Dispatch staff:** Mark orders shipped, contact customers, add delivery notes
- **Inventory staff:** Update stock, add new products, fix photos — you still approve every sale

Result: Your store keeps moving while you focus on sourcing, marketing, or rest. You control the money; your team handles the grind.

How to add a team member

1. Go to **Dashboard** → **Settings** → **Team**
2. Click **Create login** or **Invite by email**
3. Choose a role (Fulfillment, Staff, Catalog, etc.)
4. Share the login details with your staff (or they accept the email invite)
5. They sign in at cartflow-839.vercel.app/login and see only what you allowed

Why CartFlow?

WhatsApp only	CartFlow
Scattered chats	One store link
Manual account details every time	Bank details shown at checkout automatically
No order numbers	Every order has a unique ID
Guesswork on stock	Stock tracked per product
Only you can run it	Staff for dispatch & inventory; you control sales
Looks informal	Looks like a real online shop

CartFlow is built for **African social sellers** — mobile, simple, bank-transfer native. No coding. No complicated setup.

Today: manual bank transfer (customer pays you directly). **Coming soon:** Paystack / Flutterwave card payments.

How do I add my store?

1. Go to <https://cartflow-839.vercel.app/signup>
2. Create your account (name, email, password)
3. Upload your logo (optional)
4. Complete setup: store name, URL, phone, WhatsApp, **bank details**
5. Wait for **approval** (CartFlow reviews new stores)
6. Once approved:
 - Add products (**Dashboard** → **Products**)
 - Set delivery zones (**Settings**)
 - Add staff if needed (**Settings** → **Team**)
 - Copy your link: <https://cartflow-839.vercel.app/your-store-name>
1. Share on WhatsApp status, Instagram bio, everywhere

30-second pitch (memorize this)

"CartFlow gives WhatsApp sellers a proper online store in one link. Customers browse, checkout, pay to your bank, and upload their receipt. You approve orders from your phone — or let staff handle dispatch and inventory while you control the sales. No website to build. Start free at cartflow.app."

60-second pitch (for meetings)

"Most of us sell on WhatsApp — and it works until orders pile up. Receipts get lost, stock gets messy, and you're typing your account number fifty times a day. You can't step away because everything lives on your phone."

CartFlow fixes that with one link. Your customer opens it, sees your catalog, checks out, pays you, uploads proof. You approve from your dashboard — or your dispatch staff marks orders shipped while you keep control of payments and bank details.

I'll show you our demo store on your phone right now. Signup takes five minutes. You can be live this week — with or without staff."

Pricing

Plan	Price	What you get
Free	₦0	Up to 10 products, store link, order dashboard, bank transfer
Starter	₦4,999/mo	Unlimited products, analytics, low-stock alerts
Pro	₦12,999/mo	Everything in Starter + up to 5 team seats , extended analytics

Start free. Upgrade to **Pro** when you need staff to help run dispatch and inventory.

FAQ

Q: Is CartFlow free?

A: Yes — start with up to 10 products at no cost.

Q: Do I need technical skills?

A: No. If you use WhatsApp and can upload photos, you can use CartFlow.

Q: How do customers pay?

A: Bank transfer to **your** account. Customers upload a screenshot or PDF of payment.

Q: Does CartFlow hold my money?

A: No. Payment goes straight to your bank.

Q: Can I hire staff?

A: Yes — on **Pro** plan. Add fulfillment staff for dispatch, catalog staff for inventory, while you approve payments and control settings.

Q: Can staff approve payments or see my bank details?

A: No. Only the **owner** approves payments and manages bank details. Staff see a reduced dashboard based on their role.

Q: What can dispatch staff do?

A: View orders, update status (Processing, Shipped, Delivered), add notes, contact customers — but not approve money or change prices.

Q: Can I run the business when I'm traveling or not in the shop?

A: Yes. Approve payments from anywhere. Let staff handle packing and shipping updates. You stay in control of sales; they handle operations.

Q: How do I add a team member?

A: Dashboard → Settings → Team → Create login or Invite. Choose Fulfillment, Staff, Catalog, or Manager role.

Q: Do customers need an account?

A: No. Guest checkout — name, phone, address, pay, done.

Q: Can I set different delivery fees for Lekki vs Mainland?

A: Yes. Delivery zones support different fees by area.

Q: Does stock update automatically?

A: Yes (if enabled). Stock reduces when you approve payment; restores on refund.

Q: Will I get email when someone orders?

A: Not yet — check your dashboard. Email alerts coming in v2.

Q: What do I need before signup?

A: Store name, phone/WhatsApp, bank details, product photos and prices.

Q: What about Paystack or card payments?

A: Coming soon. Today it's bank transfer — what most WhatsApp sellers already use.

Q: How is this different from Shopify or Selar?

A: Built for chat-first sellers in Nigeria/Africa — mobile, simple, staff-friendly, bank transfer native. Faster to launch.
